WALLAS 2400 cabin heater

The Wallas 2400 is a compact kerosene cabin heater with a closed combustion chamber and balanced draught exhaust. Despite its compact size, the 2400 will produce 7,500 BTU at full power, 3,750 BTU at the half power setting - enough to heat the cabin on most 24 to 30 foot sailboats.

- Low current consumption, quiet operation, smoke free operation and reliability make the 2400 a great choice for year round comfort.
- Two speed/power settings allow for more versatile and efficient operation under a variety of conditions.
- Comes equipped with remote control panel and wiring harness. Thermostatic control optional.
- Kit includes mounting hinge plate for easy service removal and reinstallation.
