# Wallas 3007 ICP control panel with Thermo Beacon:

This remarkable system allows your Wallas Viking or Spartan product to react and communicate with you more completely than any existing forced air marine heating system, with the following features and benefits:

Sensor Beacon

Bluetooth interface

- Bluetooth control and interface anywhere within 35'
  of the system, via your iOS or Android smartphone.
  Control your heater from your stateroom while still
  in bed!

- You can also connect your controls via WiFi for
  control and monitoring from anywhere in the world.

- WiFi link also lets us review, diagnose and tune your
  heater from our offices if necessary.

- This system gives you direct access to hours run,
  number of starts, system voltage, room temperature, faults, air boost,
  thermo control heating with pause/restart, and ventilation only operation.

- Direct heating power control is available when using the 3007 panel
  itself.

- Thermo sensing by wired sensor and portable Bluetooth sensor beacon
  (selectable and included). © 2020 Two Mac Inc.
